

Project Rubric - Level 3

Rater (that's you) _____

Designer (the person who programmed it) _____

Project _____

Concerns Areas That Need Work	Criteria Standards for Performance	Advanced Evidence of Exceeding Standards
<u>Comprehension</u>	<u>Comprehension</u> The program runs without errors. All specifications have been met.	<u>Comprehension</u>
<u>Sequencing</u>	<u>Sequencing</u> The code follows a natural flow. Every function is responsible for a single task. The front end is separated from the back end. The page has an intuitive flow to it. All interaction is programmed correctly and all links are viable.	<u>Sequencing</u>
<u>Variables</u>	<u>Variables</u> Global variables have been declared and defined at the beginning of the program. All variables whose purposes are limited to single functions are declared as local variables using the var keyword. Parameters and return values are used where appropriate instead of global variables.	<u>Variables</u>
<u>Display</u>	<u>Display</u> There is an intuitive user interface. All formatting has been done through the use of CSS and current (non-deprecated) HTML tags.	<u>Display</u>
<u>Planning</u>	<u>Planning</u> There is evidence of planning which may include (but is not limited to): An outline of the program, pseudocode, or different versions.	<u>Planning</u>
